

CATEYE CS-1000 TURBO TRAINER (& BIKE) AVAILABLE FOR DONATION TO RAINBOWS CHILDRENS HOSPICE

Not the most modern indoor trainer but is fully adjustable to fit any bike with 700C rear wheel and traditional dropouts. (Will not fit through axles.) Works with a fan, which can be removed, and electromagnetic resistance to simulate climbing from 0-10% gradient.

The display unit shows distance, speed, elapsed time, power, grade and calories in metric or imperial units.

Note: It's even possible to use it for some 'Virtual' cycling using The Sufferfest and its 'Virtual Power' application if a speed cadence sensor is used on the bike. This also requires a pc running Windows 10 or a Mac Book plus an Ant to USB connector.

AVAILABLE IMMEDIATELY WITH ALL PROCEEDS DONATED TO RAINBOWS CHILDRENS HOSPICE, LOUGHBOROUGH. SUGGESTED DONATION, APPROX £60 + £40 FOR BIKE SHOWN, IF REQUIRED, preferably with GIFT AID DECLARATION.

DETAILS: COLIN OR ROSY GRAY 0115 9234867 OR colinrosy@googlemail.com
